Subject Index of Volume 51

Adhesion
adhesion, friction and wear between polytetrafluoroethylene and nitrogen-implanted stainless steel, 146
ion-beam-enhanced adhesion of iron films to sapphire substrates, 129
Aluminium
20 keV–40 MeV lithium implantation profiles in aluminium, 372
charge injection properties of iridium oxide films produced on Ti–6Al–4V alloy substrates by ion beam mixing techniques, 385
computer simulations and transmission electron microscopy investigations of nitrogen implanted into aluminium at high temperature, 441
diffusion behaviour of lead implanted into aluminium, 461
effects of ion implantation and plasma treatment on tribological properties of aluminium and Al–Mg alloy, 157
external oxidation of aluminium–lithium alloys, 57
formation of intermetallic compounds with a high flux pulse molybdenum ion beam in steel and aluminium, 455
formation of small metallic precipitates of niobium in α-Al_2O_3 implanted with niobium ions, 410
high temperature nitrogen implantation of Ti–6Al–4V
I: Microstructure characterization, 100
high temperature nitrogen implantation of Ti–6Al–4V
II: Tribological properties, 106
ion bombardment of AlN films deposited in a reactive sputtering process with accurate control of the mass flow of the reactive gas, 500
study of the dynamic processes involved during nitrogen implantation into aluminum, 368
the effect of carbon ion implantation on the nucleation of diamond on Ti–6Al–4V alloy, 307
the effects of beam energy and substrate temperature on the tribological properties of hard-carbon films on aluminum, 139
the pitting behavior of silicon nitride ion beam assisted deposited coatings on aluminum, 30
Annealing
formation and annealing behavior of an amorphous layer induced by tin implantation into sapphire, 415
Argon
surface topography of $^{40}Ar^+$ and $^{84}Kr^+$ bombarded copper, silver and nickel, 392
Atomic mixing
ion beam induced atomic mixing at the Ti–C interface and its implications for mechanical properties, 162
Austenite
tribological and microstructural studies of oxygen-implanted ferrite and austenite, 133

Boron
boron implantation into AISI 52100 steel, 446
boron nitride films synthesized by ion-beam-assisted deposition, 190
hardness and wear properties of boron-implanted poly(ether-ether-ketone) and poly-ether-imide, 267

Carbide twist drills
modification technology of N^+ implantation of carbide twist drills used in printed circuit boards and its industrial application, 551
Carbon
anomalous ranges of ions implanted into carbon, 364
metal vapour vacuum arc source ion implantation as a surface treatment technique for industrial tool bits, 534
effect of target temperature during carbon implantation on the composition and electrochemical properties of iron surface layers, 13
effects of room temperature carbon, nitrogen and oxygen implantation on the surface hardening and corrosion protection of iron, 19
enhanced wear resistance of production tools and steel samples by implantation of nitrogen and carbon ions, 152
ion beam induced atomic mixing at the Ti–C interface and its implications for mechanical properties, 162
kinetics of ion beam deposition of carbon at room temperature, 247
physicochemical and tribological characterization of titanium or titanium plus carbon implanted AISI M2 steel, 87
reduction of friction and wear by ion-implanted carbonized photoresist, 124
synthesis and characterization of diamond-like carbon films for optical and mechanical applications, 258
the effect of carbon ion implantation on the nucleation of diamond on Ti–6Al–4V alloy, 307
the effects of beam energy and substrate temperature on the tribological properties of hard-carbon films on aluminium, 139
trapping, diffusion and release of helium in single-crystal TiC observed by thermal desorption spectrometry, 338
Carbon thin films
effects of ion beam bombardment of carbon thin films deposited onto tungsten carbide and tool steels, 509
Catalysis
electrocatalytic protection against hydrogen embrittlement of tantalum in strong acids by platinum ion implantation, 41
studies of surface composition and electrocatalytic activity of titanium cathodes implanted with Ni^+, 35
Ceramics
pulsed laser deposition of electronic ceramics, 290
Cerium
the influence of cerium ion implantation on chromium oxidation, 65
Chromium
characterization study of nitrogen-ion-implanted amorphous bright chromium deposited films, 313
chemical and structural effects of phosphorus on the corrosion behavior of ion beam mixed Fe–Cr–P alloys, 6
distribution of ion-implanted yttrium in Cr_2O_3 scales and in the underlying Ni-25wt.%Cr alloy, 73
implantation of titanium, chromium, yttrium, molybdenum, silver, hafnium, tantalum, tungsten and platinum ions generated by a metal vapor vacuum ion source into 440C stainless steel, 166
ion implantation effects on fatigue properties of Fe–13Cr–15Ni alloys, 112
microstructure and corrosion behaviour of chromium nitride grown by dynamical ion beam mixing, 222
Nb–Cr alloy coatings produced by ion-beam-assisted deposition, 212

phase composition of chromium films deposited under nitrogen ion bombardment and their corrosion protection potential, 469
the influence of cerium ion implantation on chromium oxidation, 65
Cold fusion
current issues in cold fusion research: heat, helium, tritium, and energetic particles, 283
Commercial applications
ion implantation as an industrial process, 540
Composition
studies of surface composition and electrocatalytic activity of titanium cathodes implanted with Ni^+, 35
Computer control
a computerized end-station for a high-current ion implanter, 556
Copper
effects of ion beam and pulsed laser irradiation on Fe–Cu multilayers, 429
surface topography of $^{40}Ar^+$ and $^{84}Kr^+$ bombarded copper, silver and nickel, 392
Corrosion
chemical and structural effects of phosphorus on the corrosion behavior of ion beam mixed Fe–Cr–P alloys, 6
effects of room temperature carbon, nitrogen and oxygen implantation on the surface hardening and corrosion protection of iron, 19
microstructure and corrosion of nitrogen implanted AISI 304 stainless steel, 24
microstructure and corrosion behaviour of chromium nitride grown by dynamical ion beam mixing, 222
phase composition of chromium films deposited under nitrogen ion bombardment and their corrosion protection potential, 466
the effect of the angle of incidence on the aqueous corrosion of ion implanted M50 steel substrates, 483

Densification
simulation of deposition and densification in an ion beam environment, 328
Deposition
boron nitride films synthesized by ion-beam-assisted deposition, 190
Nb–Cr alloy coatings produced by ion-beam-assisted deposition, 212
Diamond
the effect of carbon ion implantation on the nucleation of diamond on Ti–6Al–4V alloy, 307
Diffusion
trapping, diffusion and release of helium in single-crystal TiC observed by thermal desorption spectrometry, 338
Difussion
diffusion behaviour of lead implanted into aluminium, 461
Dry coatings
surface modification of stainless steel in coil by an in-line dry coating process, 522

Fatigue
ion implantation effects on fatigue properties of Fe–13Cr–15Ni alloys, 112
Frenkel defects
reactivity of palladium ions implanted into Nb_2O_5 layers and the Frenkel defects produced, 379
Friction
adhesion, friction and wear between polytetrafluoroethylene and nitrogen-implanted stainless steel, 146
reduction of friction and wear by ion-implanted carbonized photoresist, 124

Germanium
microstructure modifications during early stages of ion-beam assisted film growth of germanium on SiO_2, 243
Gold
high-temperature implantation of gold into nickel, 435

Hafnium
implantation of titanium, chromium, yttrium, molybdenum, silver, hafnium, tantalum, tungsten and platinum ions generated by a metal vapor vacuum ion source into 440C stainless steel, 166
Hardness
hardness and wear properties of boron-implanted poly(ether-ether-ketone) and poly-ether-imide, 267
structural changes of materials modified by ion beams and the nature of their hardening, 186
Helium
current issues in cold fusion research: heat, helium, tritium, and energetic particles, 283
trapping, diffusion and release of helium in single-crystal TiC observed by thermal desorption spectrometry, 338
Hydrogen
electrocatalytic protection against hydrogen embrittlement of tantalum in strong acids by platinum ion implantation, 41

Ion beam mixing
charge injection properties of iridium oxide films produced on Ti–6Al–4V alloy substrates by ion beam mixing techniques, 385
chemical and structural effects of phosphorus on the corrosion behavior of ion beam mixed Fe–Cr–P alloys, 6
ion-beam mixing with chemical guidance
II: Analysis for positive heats of mixing, 343
microstructure and corrosion behaviour of chromium nitride grown by dynamical ion beam mixing, 222
Ion bombardment
solid lubricating films produced by ion bombardment of sputter deposited MoS_x films, 118
Iridium
charge injection properties of iridium oxide films produced on Ti–6Al–4V alloy substrates by ion beam mixing techniques, 385
Iron
chemical and structural effects of phosphorus on the corrosion behavior of ion beam mixed Fe–Cr–P alloys, 6
effect of target temperature during carbon implantation on the composition and electrochemical properties of iron surface layers, 13
effects of ion beam and pulsed laser irradiation on Fe–Cu multilayers, 429
effects of room temperature carbon, nitrogen and oxygen implantation on the surface hardening and corrosion protection of iron, 19
ion implantation effects on fatigue properties of Fe–13Cr–15Ni alloys, 112
ion-beam-enhanced adhesion of iron films to sapphire substrates, 129
krypton ion and pulsed laser-induced reactions in the Fe–Si system, 451
surface modification of iron and steel by zirconium or yttrium ion implantation and their electrochemical properties, 1
synthesis and stability of nitride layers in iron by megaelectronvolt nitrogen implantation, 79
tribological and microstructural studies of oxygen-implanted ferrite and austenite, 133

Kinetics
kinetics of ion beam deposition of carbon at room temperature, 247
Krypton
krypton ion and pulsed laser-induced reactions in the Fe–Si system, 451
surface topography of $^{40}Ar^+$ and $^{84}Kr^+$ bombarded copper, silver and nickel, 392

Lead
diffusion behaviour of lead implanted into aluminium, 461
Lithium
20 keV–40 MeV lithium implantation profiles in aluminium, 372
external oxidation of aluminium-lithium alloys, 57

Magnesium
effects of ion implantation and plasma treatment on tribological properties of aluminium and Al–Mg alloy, 157
ion bombardment, ultrasonic, and pulsed laser beam effects on small metallic clusters of potassium in MgO, 471
Mechanical properties
are coatings produced by ion-beam-assisted deposition superior? A comparison of chemical and mechanical properties of steel coated using different deposition techniques, 217
ion beam induced atomic mixing at the Ti–C interface and its implications for mechanical properties, 162
Metal ion beams
versatile high current metal ion implantation facility, 529
Metallic materials
wear resistance of ion-implanted metallic materials, 180
MEVVA
metal vapour vacuum arc source ion implantation as a surface treatment technique for industrial tool bits, 534
performance of the advanced MEVVA IV 80–10 metal ion implantation system, 546
versatile high current metal ion implantation facility, 529
Microstructure
high temperature nitrogen implantation of Ti–6Al–4V
I: Microstructure characterization, 100
microstructure and corrosion of nitrogen implanted AISI 304 stainless steel, 24
microstructure and corrosion behaviour of chromium nitride grown by dynamical ion beam mixing, 222
microstructure modifications during early stages of ion-beam assisted film growth of germanium on SiO_2, 243
the interdependency of microstructure, stress and wear for ion beam modified tool steels, 93
tribological and microstructural studies of oxygen-implanted ferrite and austenite, 133
Molybdenum
effect of a titanium nitride interlayer on the endurance and composition of a molybdenum disulfide coating prepared by ion-beam-assisted deposition, 232
formation of intermetallic compounds with a high flux pulse molybdenum ion beam in steel and aluminium, 455
implantation of titanium, chromium, yttrium, molybdenum, silver, hafnium, tantalum, tungsten and platinum ions generated by a metal vapor vacuum ion source into 440C stainless steel, 166

Nickel
a study of high temperature oxidation of nickel after ion implantation, 52
distribution of ion-implanted yttrium in Cr_2O_3 scales and in the underlying Ni-25wt.%Cr alloy, 73
high-temperature implantation of gold into nickel, 435
ion implantation effects on fatigue properties of Fe–13Cr–15Ni alloys, 112
secondary ion mass spectrometry and scanning transmission and transmission electron microscopy studies of the effects of reactive elements on nickel oxidation, 45
self-ion sputtering yield determinations of (100) nickel thin films, 399
studies of surface composition and electrocatalytic activity of titanium cathodes implanted with Ni^+, 35
surface topography of $^{40}Ar^+$ and $^{84}Kr^+$ bombarded copper, silver and nickel, 392
Niobium
formation of small metallic precipitates of niobium in α-Al_2O_3 implanted with niobium ions, 410
Nb–Cr alloy coatings produced by ion-beam-assisted deposition, 212
reactivity of palladium ions implanted into Nb205 layers and the Frenkel defects produced, 379
Nitrides
boron nitride films synthesized by ion-beam-assisted deposition, 190
Nitrogen
adhesion, friction and wear between polytetrafluoroethylene and nitrogen-implanted stainless steel, 146
characterization study of nitrogen-ion-implanted amorphous bright chromium deposited films, 313
computer simulations and transmission electron microscopy investigations of nitrogen implanted into aluminium at high temperature, 441
effects of room temperature carbon, nitrogen and oxygen implantation on the surface hardening and corrosion protection of iron, 19
enhanced wear resistance of production tools and steel samples by implantation of nitrogen and carbon ions, 152
high temperature nitrogen implantation of Ti–6Al–4V
I: Microstructure characterization, 100
high temperature nitrogen implantation of Ti–6Al–4V
II: Tribological properties, 106
investigation of ZrN thin film prepared by dynamic mixing, 252
ion bombardment of AlN films deposited in a reactive sputtering process with accurate control of the mass flow of the reactive gas, 500
microstructure and corrosion of nitrogen implanted AISI 304 stainless steel, 24
modification technology of N^+ implantation of carbide twist drills used in printed circuit boards and its industrial application, 551
phase composition of chromium films deposited under nitrogen ion bombardment and their corrosion protection potential, 466
study of the dynamic processes involved during nitrogen implantation into aluminum, 368
synthesis and stability of nitride layers in iron by megaelectronvolt nitrogen implantation, 79
Nucleation
the effect of carbon ion implantation on the nucleation of diamond on Ti–6Al–4V alloy, 307

Oxidation
a study of high temperature oxidation of nickel after ion implantation, 52
external oxidation of aluminium–lithium alloys, 57
protective behaviour against high temperature oxidation of silicon nitride films synthesized by ion-beam-assisted deposition, 227
secondary ion mass spectrometry and scanning transmission and transmission electron microscopy studies of the effects of reactive elements on nickel oxidation, 45

the influence of cerium ion implantation on chromium oxidation, 65
Oxygen
characteristics of TiO_2 coatings produced by the reactive ionized cluster beam method, 197
effects of room temperature carbon, nitrogen and oxygen implantation on the surface hardening and corrosion protection of iron, 19

Palladium
reactivity of palladium ions implanted into Nb_2O_5 layers and the Frenkel defects produced, 379
Phase transformations
phase transformations in phosphorus ion implanted 304L stainless steel, 420
Phosphorus
chemical and structural effects of phosphorus on the corrosion behavior of ion beam mixed Fe–Cr–P alloys, 6
phase transformations in phosphorus ion implanted 304L stainless steel, 420
Plasma immersion
plasma immersion ion implantation: duplex layers from a single process, 489
Platinum
electrocatalytic protection against hydrogen embrittlement of tantalum in strong acids by platinum ion implantation, 41
the preparation of epitaxial platinum films by pulsed laser deposition, 476
Potassium
ion bombardment, ultrasonic, and pulsed laser beam effects on small metallic clusters of potassium in MgO, 471
Pulsed laser deposition
pulsed laser deposition of electronic ceramics, 290

Resistance
enhanced wear resistance of production tools and steel samples by implantation of nitrogen and carbon ions, 152
ion implantation of titanium alloys for improved fretting resistance, 176

Sapphire
formation and annealing behavior of an amorphous layer induced by tin implantation into sapphire, 415
ion-beam-enhanced adhesion of iron films to sapphire substrates, 129
Secondary ion mass spectrometry
depth profiles, projected ranges, and secondary ion mass spectrometry relative sensitivity factors for more than 50 elements from hydrogen to uranium implanted into metals, 358
secondary ion mass spectrometry and scanning transmission and transmission electron microscopy studies of the effects of reactive elements on nickel oxidation, 45
Silicon
krypton ion and pulsed laser-induced reactions in the Fe–Si system, 451
microstructure modifications during early stages of ion-beam assisted film growth of germanium on SiO_2, 243
protective behaviour against high temperature oxidation of silicon nitride films synthesized by ion-beam-assisted deposition, 227
the pitting behavior of silicon nitride ion beam assisted deposited coatings on aluminum, 30
Silver
a molecular dynamics analysis of low energy atom-surface interaction during energetic deposition of silver thin films, 324
implantation of titanium, chromium, yttrium, molybdenum, silver, hafnium, tantalum, tungsten and platinum ions generated by a metal vapor vacuum ion source into 440C stainless steel, 166
surface topography of $^{40}Ar^+$ and $^{84}Kr^+$ bombarded copper, silver and nickel, 392
Single-crystal
trapping, diffusion and release of helium in single-crystal TiC observed by thermal desorption spectrometry, 338
Sputter deposition
solid lubricating films produced by ion bombardment of sputter deposited MoS_x films, 118
Sputtering
In situ investigation of sputter-deposited thin films by ion sputtering spectrometry, 405
ion bombardment of AlN films deposited in a reactive sputtering process with accurate control of the mass flow of the reactive gas, 500
self-ion sputtering yield determinations of (100) nickel thin films, 399
Stainless steel
adhesion, friction and wear between polytetrafluoroethylene and nitrogen-implanted stainless steel, 146
surface modification of stainless steel in coil by an in-line dry coating process, 522
microstructure and corrosion of nitrogen implanted AISI 304 stainless steel, 24
phase transformations in phosphorus ion implanted 304L stainless steel, 420
Steel
are coatings produced by ion-beam-assisted deposition superior? A comparison of chemical and mechanical properties of steel coated using different deposition techniques, 217
boron implantation into AISI 52100 steel, 446
effects of ion beam bombardment of carbon thin films deposited onto tungsten carbide and tool steels, 509
enhanced wear resistance of production tools and steel samples by implantation of nitrogen and carbon ions, 152
formation of intermetallic compounds with a high flux pulse molybdenum ion beam in steel and aluminium, 455
physicochemical and tribological characterization of titanium or titanium plus carbon implanted AISI M2 steel, 87
surface modification of iron and steel by zirconium or yttrium ion implantation and their electrochemical properties, 1
the effect of ion implantation on the lifetime of punches, 495
the effect of the angle of incidence on the aqueous corrosion of ion implanted M50 steel substrates, 483
Stress
the interdependency of microstructure, stress and wear for ion beam modified tool steels, 93
Synthesis
boron nitride films synthesized by ion-beam-assisted deposition, 190
ion-beam-assisted deposition and ion beam synthesis of wear resistant coatings on technical surfaces, 237
protective behaviour against high temperature oxidation of silicon nitride films synthesized by ion-beam-assisted deposition, 227
synthesis and characterization of diamond-like carbon films for optical and mechanical applications, 258
synthesis and stability of nitride layers in iron by megaelectronvolt nitrogen implantation, 79

Tantalum
electrocatalytic protection against hydrogen embrittlement of tantalum in strong acids by platinum ion implantation, 41

Temperature
a study of high temperature oxidation of nickel after ion implantation, 52
effect of target temperature during carbon implantation on the composition and electrochemical properties of iron surface layers, 13
effects of room temperature carbon, nitrogen and oxygen implantation on the surface hardening and corrosion protection of iron, 19
high temperature nitrogen implantation of Ti–6Al–4V I: Microstructure characterization, 100
high temperature nitrogen implantation of Ti–6Al–4V II: Tribological properties, 106
protective behaviour against high temperature oxidation of silicon nitride films synthesized by ion-beam-assisted deposition, 227
the effects of beam energy and substrate temperature on the tribological properties of hard-carbon films on aluminium, 139
Tin
formation and annealing behavior of an amorphous layer induced by tin implantation into sapphire, 415
Titanium
characteristics of TiO_2 coatings produced by the reactive ionized cluster beam method, 197
charge injection properties of iridium oxide films produced on Ti–6Al–4V alloy substrates by ion beam mixing techniques, 385
metal vapour vacuum arc source ion implantation as a surface treatment technique for industrial tool bits, 534
effect of a titanium nitride interlayer on the endurance and composition of a molybdenum disulfide coating prepared by ion-beam-assisted deposition, 232
high temperature nitrogen implantation of Ti–6Al–4V I: Microstructure characterization, 100
high temperature nitrogen implantation of Ti–6Al–4V II: Tribological properties, 106
implantation of titanium, chromium, yttrium, molybdenum, silver, hafnium, tantalum, tungsten and platinum ions generated by a metal vapor vacuum ion source into 440C stainless steel, 166
ion beam induced atomic mixing at the Ti–C interface and its implications for mechanical properties, 162
ion implantation of titanium alloys for improved fretting resistance, 176
physicochemical and tribological characterization of titanium or titanium plus carbon implanted AISI M2 steel, 87
studies of surface composition and electrocatalytic activity of titanium cathodes implanted with Ni^+, 35
the effect of carbon ion implantation on the nucleation of diamond on Ti–6Al–4V alloy, 307
trapping, diffusion and release of helium in single-crystal TiC observed by thermal desorption spectrometry, 338
Transmission electron microscopy
secondary ion mass spectrometry and scanning transmission and transmission electron microscopy studies of the effects of reactive elements on nickel oxidation, 45
Tribology
effects of ion implantation and plasma treatment on tribological properties of aluminium and Al–Mg alloy, 157
high temperature nitrogen implantation of Ti–6Al–4V II: Tribological properties, 106
physicochemical and tribological characterization of titanium or titanium plus carbon implanted AISI M2 steel, 87
the effects of beam energy and substrate temperature on the tribological properties of hard-carbon films on aluminium, 139
tribological and microstructural studies of oxygen-implanted ferrite and austenite, 133
Tritium
current issues in cold fusion research: heat, helium, tritium, and energetic particles, 283
Tungsten carbide
effects of ion beam bombardment of carbon thin films deposited onto tungsten carbide and tool steels, 509

Vanadium
charge injection properties of iridium oxide films produced on Ti–6Al–4V alloy substrates by ion beam mixing techniques, 385
high temperature nitrogen implantation of Ti–6Al–4V I: Microstructure characterization, 100
high temperature nitrogen implantation of Ti–6Al–4V II: Tribological properties, 106
the effect of carbon ion implantation on the nucleation of diamond on Ti–6Al–4V alloy, 307

Wear
adhesion, friction and wear between polytetrafluoroethylene and nitrogen-implanted stainless steel, 146
enhanced wear resistance of production tools and steel samples by implantation of nitrogen and carbon ions, 152
hardness and wear properties of boron-implanted poly(ether-ether-ketone) and poly-ether-imide, 267
ion-beam-assisted deposition and ion beam synthesis of wear resistant coatings on technical surfaces, 237
reduction of friction and wear by ion-implanted carbonized photoresist, 124
the effect of ion implantation on the lifetime of punches, 495
the interdependency of microstructure, stress and wear for ion beam modified tool steels, 93
wear resistance of ion-implanted metallic materials, 180

X-ray optics
technological development of soft X-ray mirror in the Advanced Material Processing and Machining Technology Research Association (AMMTRA), 273

Yttrium
distribution of ion-implanted yttrium in Cr_2O_3 scales and in the underlying Ni-25wt.%Cr alloy, 73
implantation of titanium, chromium, yttrium, molybdenum, silver, hafnium, tantalum, tungsten and platinum ions generated by a metal vapor vacuum ion source into 440C stainless steel, 166
surface modification of iron and steel by zirconium or yttrium ion implantation and their electrochemical properties, 1

Zirconium
investigation of ZrN thin film prepared by dynamic mixing, 252
surface modification of iron and steel by zirconium or yttrium ion implantation and their electrochemical properties, 1
